

**Interview Prompts**

1	1	Please describe what age-defiant architecture means to you?
2	2	How does this approach to design inform your practice?
3	3	What role do clients play in directing your inclusion of specific age-defying features or structural components?
4	4	How important are innovative technologies such as smart hubs and voice activated systems for today's ageing population?
5	5	How can designers accommodate multiple generations of residents in age-defying housing?
6	6	In what ways do accessible living add value for older residents?
7	7	Describe some ways of achieving an integrated indoor-outdoor flow for age-defying housing.
8	8	What are your most important features when designing age-defiant housing?
9	9	Is it possible to design for active lifestyles without compromising architectural form? How or why not?
10	10	What are some innovations that you would like to see adopted for age-defiant housing in the future?
